

MJ20 HEAVY DUTY COVERSTRIP

MJ20 aluminium heavy duty cover strip is designed for use on internal installations, where flooring of different types and heights meet with maximum height variation of 10mm.

Product specifications

Product code:

MJ20

Overall length:

3.66m

Horizontal width:

50mm

Vertical Height:

3.9mm

Anodised finishes:

Black (BL)

✓

Silver (SI)

✓

Countersunk hole spacing:

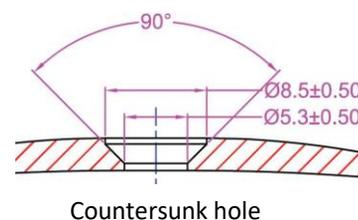

17 holes at 220mm centres

Countersunk punched hole:

8.5 x 5.3mm

Lengths per carton:

10

Countersunk hole

Notation: MJ20 trims are supplied with matching colour screws and plugs

Installation instructions

Cut the MJ20 to your required length. Secure in place utilising an MJS 6mm masonry drill bit and supplied 6mm plugs and screws. When being installed on hard surfaces such as concrete or timber a bead of MJS GF400 adhesive can be run along the bottom of both edges of the extrusion to fill in any surface variations between the flooring surface and coverstrip. This could eliminate any subsequent “tapping” effect that could develop.

Safety statement: When cutting or drilling aluminium we recommend the use of safety glasses and gloves.
