22mm	21mm	23.2mm	2.5mm
25mm	21mm	26.2mm	2.5mm

Notation: Some profiles are also available in the following colour bank.

Installation instructions

- Cut the aluminium angle to your required length. For tile installations secure in place using tile adhesive or for timber or vinyl installations use MJS GF400 adhesive.
- Ensure all excess grout and adhesive is removed with sponge and warm water immediately.
- Anodised angle is supplied with protective foil, this is to be removed after grouting.

Safety statement: When cutting or drilling aluminium we recommend the use of safety glasses and gloves.
