Notation: All profiles are also available in Gloss White & Black except 15mm profile

Installation instructions

- Cut the aluminium formable angle to your required length. Form the curve by abutting the face of the trim (Side C) to the curved edge of the tile or timber flooring and secure in place using MJS GF400 adhesive.
- Install your flooring into the aluminium formable angle and ensure all excess grout and adhesive is removed with sponge and warm water immediately.

Safety statement: When cutting or drilling aluminium we recommend the use of safety glasses and gloves.
